PURPOSE AND OBJECTIVES OF THE COMPETITION OF IDEAS:

The Municipality of Sutrio is working on a strategic project, with the idea of implementing the redevelopment of the village and its surroundings. The main goal includes the preservation of the historical heritage and the arrangement of the existing internal street network, but mainly concerns the recovery of existing buildings. Most of them have already been restored thanks to the project "Albergo diffuso" ("Hotel network").

Sutrio is known as "il pais dai marangons" ("the carpenters village") and it is obvious that timber should always have been considered the main material in each of its redevelopment project.

Timber thus became the main theme of all activities to look through innovation and technology to track the routes of our development.

As a result of the projects of recovery and restoration, Sutrio now looks like a beautiful historic village; the entrance of the village instead shows the need for conversion planning interventions. In fact, at the time of the economic boom a series of buildings has been built for the production and sale of wood furniture, which is now considered as an archeological industrial area that needs to be recovered for other uses.

For these reasons, the Municipality of Sutrio opens the following announcement for a Competition of ideas aimed at redesigning the entrance of the village, now unfortunately reduced to a degraded area. This idea was born in order to implement the professional distinctive offer during the international architectural symposium, which the furniture industry and wooden buildings constructors are interested, and moreover to give the possibility to the new generations of students and / or professionals UNDER 30 to express their talent in the redesign of this urban space.

The Municipality of Sutrio decided to assign the responsibility of the competition to the AGAF (Association Jounge Architects of Ferrara) after the fruitful organization of the last three editions of the architectural symposium "Simply timber".

The aim of the competition is to get ideas and design hypothesis aimed to obtain:

- a plan diagram where the relationships between the parts of the project and the environmental context in which they are located have to be defined;
- the preliminary architectural drawings of the project, from which the following and the final design levels might be developed ;

The architectural drawings will be composed at least by the following documents:

- technical report;
- architectural drawings;
- structural feasibility analysis;
- summary estimate of costs and general economic intervention.

DOCUMENTATION:

All documentation, including this notice and attachments, can be downloaded directly from the web sites www.comune.sutrio.ud.it and www.agaf.fe.it .

DEADLINES:

The projects and applications for the competition must be sent to the following address: Pro loco Sutrio – Via R. Linussio n. 1 – 33020 Sutrio (Udine) – Italia no later than October 31, 2011.

PUBLICATION DATE:

The announcement will be officially published on July 26, 2011.

AWARDS:

The competition will conclude with a final ranking with the award of three prizes, respectively for the three top finalists. The jury can assign two additional special mentions, with the allocation of bonus.

OTHER INFORMATION:

Further information and details are to be found in the regulation documents.

DISCIPLINARY OF COMPETITION

COMPETITION OF IDEAS FOR THE DESIGN AND DEVELOPMENT OF THE NEW ENTRANCE TO
THE TOWN OF SUTRIO CALLED: A GATE FOR SUTRIO

CHAPTER I

DEFINITION OF THE COMPETITION

Art. 1_ THEME, OBJECTIVES AND GUIDELINES OF THE COMPETITION.

On the occasion of the annual symposium of the 2011 international architecture "**Semplicemente legno**" ("**Simply timber**") the City Council, with the local Pro Loco tourism promotion association, and the cooperative of Sutrio carpenters, intend create, organized by AGAF, an "International Competition of ideas " for young architects and / or engineers born after 01/01/1981, entitled:

A GATE FOR SUTRIO

In this sense, the event is thought as a double opportunity for the municipal administration; for the generations of young professionals, trying to imagine a new and attractive image of the entrance of the village characterized by the use of the material "wood", the emblem of the history and economy of the village, creating a metaphorical door drawing the attention for those who will cross it every day, or of those who, just lap along the roads leading to the other adjacent localities, first of all the access to the junction for the Monte Zoncolan.

Therefore the idea is to think about a global redevelopment of the entrance of the village. The area falls within a circle of buildings located around the entrance junction road. First and foremost, the historical sawmill and mill complex subject of refurbishment enabling the creation of the historic economic and cultural heart of the city known as "Cjase dal len" ("Timber house"), as well as the complex of buildings originally included in the joinery Dorotea next to the property of the Di Ronco's family. Next to this buildings there is a single house on the border with the local infant school, near two bus stops that serve the valley. The area and the of bus stop system need a clear distinctive spatial and functional reorganization in order with the main purpose of the junction definition of the village. The main idea is to think about an architectural wooden element that frames the entrance of the village.

The work of the Selection Committee is confidential, the same will be issued in a special report, signed by all members, secured to the acts of the organization.

However the final report will be public, and will contain a brief description of the methodology and the routines of the evaluation work.

Art. 12_ CRITERIA AND METHODS FOR THE EVALUATION OF PROPOSALS

The first prize will be awarded to any project that will get the highest score due to the following assessment:

Step 1 - evaluation by the international jury. It will select the best possible 10 projects (minimum score of 60 points), the competition will be valid if at least 2 projects will get the minimum score to advance to second step.

Specifically, the general evaluation of projects, carried out by the international jury, will be divided over a maximum of 100 points, divided as follows:

- architectural quality related of the “Gate for Sutrio”: maximum **30 points**;
- urban and architectural requalification of the project area: maximum of **20 points**;
- general reorganization of traffic and access to the village: maximum of **15 points**;
- employment of the wood materials: maximum **15 points**;
- technical feasibility and durability of construction: maximum **10 points**;
- economic and sustainability feasibility: a maximum of **10 points**.

Step 2 – popular referendum. The projects selected by the international jury in Step 1 will be publicly exposed and subsequently tried by the popular jury (adult population residing in the municipalities making up the Inter-Association "But the Upper Valley," that are Cercivento, Paluzza Ravascletto, Sutrio and Treppo Carnico, voting will be anonymous and valid upon registration of the voter's personal card) which can add up to another 20 points to the total.

The popular vote is valid if the total will reach a quorum of voters at least of 15 units for each finalist project exposed (that has to be minimum 2 and maximum 10 for which the quorum will be reached between 30 to 150 individual voters regardless of the validity or otherwise of the ballots counted).

Specifically, the general evaluation of projects carried out by the popular jury is divided over a maximum of 20 points, divided as follows:

- **20 points** for preferences more than 50% +1 of the total valid ballots;
- **15 points** by priority preference between 40 and 50% of the total;
- **10 points** by priority preference between 30 and 40% of the total;
- **5 points** by priority preference between 20 and 30% of the total;
- **3 points** for priority preferences below the limit of 20% of the total.

If in a group, even **if only one participant** is a finalist resident in the municipalities that will vote for the referendum, the score of the referendum will be halved.

In the event of a tie score awarding public preferences, the score will be equally distributed among the favorite projects, while at the same overall score, the higher will prevail awarded by the jury and, if still necessary, prevail in descending order from the best individual evaluations from the point a) up to that e).

Should none of the projects presented reach the minimum score predicted, the Competition Promoter will not award any prize.

Art. 13_ RESULT OF THE COMPETITION AND PRIZES

The competition will conclude with a final ranking and the allocation of n° 3 awards, including reimbursement of expenses, respectively:

1° prize € 2.500,00;
